

2012 Reserves and Resources

As of December 31, 2012

Disclosed in Newmont's 2012 Annual Report filed on February 22, 2013

Cautionary Statements

Cautionary Statement Regarding Forward Looking Statements, Including 2013 Outlook:

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs applicable to sales; (iii) estimates of future consolidated and attributable capital expenditures, CAS, and all-in sustaining cost; and (iv) expectations regarding the development, growth and exploration potential of the Company’s projects. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks, community relations, conflict resolution and outcome of projects or oppositions and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2012 Form 10-K, filed on February 22, 2013, with the Securities and Exchange Commission, as well as the Company’s other SEC filings. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” including, without limitation, outlook, to reflect events or circumstances after the date of this news release, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued “forward-looking statement” constitutes a reaffirmation of that statement. Continued reliance on “forward-looking statements” is at investors' own risk.

Cautionary Statement regarding Reserves and Resource

Ian Douglas, Newmont's Group Executive of Reserves, is the qualified person responsible for the preparation of the Reserve and Resource estimates in this presentation. The Reserves disclosed in this presentation have been prepared in compliance with Industry Guide 7 published by the SEC. As used in this news release, the term "Reserve" means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term "economically," as used in this definition, means that profitable extraction or production has been established or analytically demonstrated in a full feasibility study to be viable and justifiable under reasonable investment and market assumptions. The term "legally," as used in this definition, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Newmont must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Newmont's current mine plans. Reserves in this news release may be aggregated from the Proven and Probable classes. The terms "Mineral Resources" or "Resources" and Measured, Indicated and Inferred resources are used in this news release. Investors are advised that the SEC does not recognize these terms. Newmont has determined that such Resources would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration and defined as Mineral Resources. Estimates of Resources are subject to further exploration and development, are subject to additional risks, and no assurance can be given that they will eventually convert to future Mineral Reserves of the company. Inferred Resources, in particular, have a great amount of uncertainty as to their existence and their economic and legal feasibility. Investors are cautioned not to assume that any part or all of the Inferred Resource exists, or is economically or legally mineable. Also, disclosure of contained ounces is permitted under SME and other regulatory guideline; however, the SEC generally requires mineral resource information to be reported only as in-place tonnage and grade. In addition, our current or future reserves and exploration and development projects may not result in new mineral producing operations. Even if significant mineralization is discovered and converted to reserves, it will likely take many years from the initial phases of exploration to development and ultimately to production, during which time the economic feasibility of production may change. Additionally, references to "attributable ounces," "attributable pounds" and "attributable mineralization" in this news release are intended to mean that portion of gold or copper produced, sold or included in Proven and Probable Reserves or Resources that is attributable to our ownership or economic interest.

(1) Reserves are calculated at a gold price of US\$1,400, A\$1,400, or NZ\$1,800 per ounce unless otherwise noted. 2011 reserves were calculated at a gold price of US\$1,200, A\$1,250, or NZ\$1,600 per ounce unless otherwise noted. Tonnage amounts have been rounded to the nearest 100,000 unless they are less than 50,000, and gold ounces have been rounded to the nearest 10,000.

(2) Reserve estimates provided by Barrick, the operator of the Turquoise Ridge Joint Venture.

(3) In-process material is the material on leach pads at the end of each year from which gold remains to be recovered. In-process material reserves are reported separately where tonnage or contained ounces are greater than 5% of the total site-reported reserves and contained ounces are greater than 10,000.

(4) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans. Stockpile reserves are reported separately where tonnage or contained ounces are greater than 5% of the total site-reported reserves and contained ounces are greater than 100,000.

(5) Project is under development.

(6) Reserves include the currently undeveloped deposit at La Quinua Sur and Marley, which contains reserves of 0.5 million attributable ounces.

(7) Reserves estimates were provided by Buenaventura, the operator of the La Zanja project.

(8) Project has completed Feasibility and awaits construction decision. Percentage reflects Newmont's economic interest at the time of Reserve declaration. Mineral agreement with the Government of Suriname allows the government to purchase up to 25% interest in the project within 60 days after exploitation license is issued, which is expected in early 2013.

(9) Percentage reflects Newmont's economic interest as of December 31, 2012.

(10) Reserve estimates provided by Regis Resources Ltd, in which Newmont holds a 19.75% interest.

(11) Includes undeveloped reserves at Yamfo South, Yamfo Central, Tachire West, Subenso North, Yamfo Northeast, and Susuan totaling 3.2 million ounces.

(12) Subika Underground project is under development.

(13) Project is under development.

(1) Resources are reported exclusive of reserves.

(2) Resources calculated at a gold price of US\$1,600 or A\$1,600 per ounce unless otherwise noted. 2011 Resources were calculated at a gold price of US\$1,400 or A\$1,475 per ounce. Tonnage amounts have been rounded to the nearest 100,000 and pounds have been rounded to the nearest 10 thousand.

(3) Measured and Indicated combined Resources are equivalent to Mineralized Material disclosed in Newmont's 10K filing.

(4) Resource estimates provided by Barrick, the operator of the Turquoise Ridge joint venture.

(5) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans. Stockpile reserves are reported separately where tonnage or ounces are greater than 5% of the total site-reported reserves and ounces are greater than 100,000.

(6) Reserve estimates provided by Buenaventura, the operator of the La Zanja project.

(7) Percentage reflects Newmont's economic interest at December 31, 2012.

(8) Resource estimates provided by Regis Resources Ltd, in which Newmont holds a 19.75% interest.

⁽¹⁾ Reserves are calculated at US\$3.25 or A\$3.25 per pound copper price unless otherwise noted. 2011 reserves were calculated at US\$3.00 or A\$3.15 per pound copper price unless otherwise noted. Tonnage amounts have been rounded to the nearest 100,000 and pounds have been rounded to the nearest 10 million.

⁽²⁾ Project is under development. Leach reserves are within Phoenix Reserve Pit.

⁽³⁾ Project is under development.

⁽⁴⁾ Percentage reflects Newmont's economic interest at December 31, 2012.

⁽⁵⁾ Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material. Stockpiles increase or decrease depending on current mine plans. Stockpiles are reported separately where tonnage or contained metal are greater than 5% of the total site reported reserves.

(1) Resources are reported exclusive of reserves.

(2) Resources calculated at a copper price of US\$3.50 or A\$3.50 per pound unless otherwise noted. 2011 Resources were calculated at a copper price of US\$3.50 or A\$3.70 per pound. Tonnage amounts have been rounded to the nearest 100,000 and pounds have been rounded to the nearest 10 million.

(3) Measured and Indicated combined Resources are equivalent to Mineralized Material disclosed in Newmont's 10K filing.

(4) Percentage reflects Newmont's economic interest at December 31, 2012.

(1) Mineral Resources reported exclusive of reserves.

(2) Mineral Resources calculated at a silver price of US\$35.00, A\$35.00, or NZ\$45.00 per ounce unless otherwise noted. 2011 Resources were calculated at a silver price of US\$26.00, A\$27.50, or NZ\$34.50 per ounce. Tonnage amounts have been rounded to the nearest 100,000.

(3) Measured and Indicated combined Resources are equivalent to Mineralized Material disclosed in Newmont's 10K filing.

(4) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans.

(5) Percentage reflects Newmont's economic interest at December 31, 2012.

Reserves and Resources
